REFERENCE AID

SOUTH CHINA SEA PLACENAMES

CONTENTS

南海诸岛地名

South China Sea Placenames

This reference aid contains approximately 900 entries dealing with about 290 geographic features in the South China Sea. This information is a reorganization of information contained in the appendices "Some Standard Placenames of Chinese Islands in the South China Sea" 我国南海诸岛部分标准地名 and "Terms Used in Foreign Publications Referring to Chinese Islands in the South China Sea" 外国报刊对我国南海诸岛的称谓 in the book SHIJIE DIMINGLU 世界地名录 [*World Gazetteer*] published in Beijing in 1988 by the China Encyclopedia Publishing House 中国大百科全书出版社.

The entries are arranged into 3 columns. The first column lists all the names, the second column has either the cross reference to the standard Chinese name or, if the standard Chinese name was featured in the first column, the geographic coordinates. Column 3 lists other names used in referring to that feature.

Names that were verified in the Defense Mapping Agency publication Gazetteer of the Paracel Islands and Spratly Islands, October 1987, as being approved by the United States Board on Geographic Names (BGN), are printed in boldface. BGN-approved names that were not in the original are provided in brackets []. Because the names of these islands may have political significance, translators are requested to use the name given in the source followed by the BGN-approved name in brackets.

Entries marked with an asterisk are names used by local fisherman.

Geographic coordinates were provided by the editors of SHIJIE DIMINGLU and may not be in agreement with those used by the U.S. Government.

This is a U.S. Government publication. Its contents in no way represent the policies, views, or attitudes of the U.S. Government. Users of this publication may cite FBIS or JPRS provided they do so in a manner clearly identifying them as the secondary source.

Foreign Broadcast Information Service (FBIS) and Joint Publications Research Service (JPRS) publications contain political, military, economic, environmental, and sociological news, commentary, and other information, as well as scientific and technical data and reports. All information has been obtained from foreign radio and television broadcasts, news agency transmissions, newspapers, books, and periodicals. Items generally are processed from the first or best available sources. It should not be inferred that they have been disseminated only in the medium, in the language, or to the area indicated. Items from foreign language sources are translated; those from English-language sources are transcribed. Except for excluding certain diacritics, FBIS renders personal names and place-names in accordance with the romanization systems approved for U.S. Government publications by the U.S. Board of Geographic Names.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by FBIS/JPRS. Processing indicators such as [Text] or [Excerpts] in the first line of each item indicate how the information was processed from the original. Unfamiliar names rendered phonetically are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear from the original source but have been supplied as appropriate to the context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by the source. Passages in boldface or italics are as published.
